11	St Albans, Wheeler's fig.34 no.55, under gate.	SW	
		HM Claudian	○
12	Kempston [8].	HM-	●

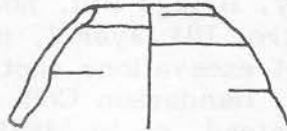

Notes

Like other C forms this continues, HM, after the conquest, but appears to begin in the 1st century BC (Braughing; Wheathampstead). Cf. the Puddlehill jar (Matthews 1976 fig.84 no.1) found in storage pit 32, and Iron Age; the form is essentially a HM one that derives from Iron Age forms. The total of 238 at Sheepen is misleading as it includes all straight-sided and/or thickened-rim vessels, often shell-tempered and sometimes rilled.
