19 Bletchley, Saffron Gardens, no.32.	R -S	○
20 'Cambridge', 1871 [917].	-	△

Notes

This is quite common, including Kent, but few at Sheepen, where the type was conflated with Cam. 214. It is distinctive enough to constitute a separate form; but only three appear in the Sheepen type trays. All examples are small and quite plain; sometimes red-surfaced, and often burnished. There is as yet no certain indication of a 1st century BC date; it flourished in the first half of the 1st century AD and some post-conquest examples are known. Broadstairs (Hurd 1909, pi.XVIII) had a cup exactly like the Roman Canewdon pot in a Roman cemetery at Rumfield, with samian of the later 1st century AD.
