

G2-6: ANGULAR SHALLOW BOWLS WITH EXAGGERATED REEDED RIM

An angular version of G2-3, this is copying the Roman bowl forms Cam.243-6, and thus should always be rare in grog, and post-conquest. The Braintree pot was found in a buried soil layer; the Prae Wood one is of uncertain fabric but not Roman.

- 1 Braintree, site E, no.5.
- 2 Prae Wood, LV Grey Clay [579].
