

B1-2: TALL PLAIN EVERTED-RIM JARS WITH OFFSET NECK

Like all the B1 forms, this often has a cordon at the junction of neck and shoulder.

1	Colchester, Sheepen, Cam.266. 'The commonest form', in native or hard thin romanising fabrics, with grog; in the type trays most are romanised and many are not even grog-tempered. Cam.265, not shown in Cam., copied 266 in native ware with thickened lip.	AD10-65	Δ●

17	Bletchley, Saffron Gardens, no.39.	-S	●

Notes

The examples show the whole range of dates and contexts; it is fairly common in E Kent as well as the Herts, centres, and can appear from the end of the 1st century BC until the post-conquest period. The Great Wakering pot, from a grave with grog-tempered vessels, is in a Roman fabric; the Canterbury jar, while unaccompanied, is in the very hard local version of grog. The Sheepen pots show that the change to romanised fabrics happened very quickly there. The list does, however, give several good examples in contexts that are likely to be early (Swarling, Wheathampstead, Braughing). It does not spread far across the Chilterns.
