9	Richborough no.240, pit 57.	Nero-Vesp	∅
	no.391, Area V.	AD50-80	○

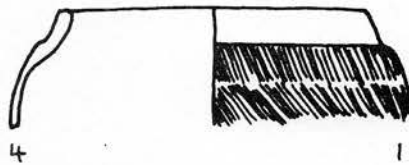

Notes

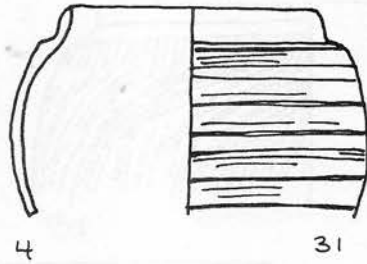

This is an east Kent form of the 1st century AD with a strong post-conquest bias; it is often grog-tempered, if very hard, in Kent, but those that appear on the Essex coast are usually shelly and of the conquest period. Specimens are often well-made with a variety of decoration.
