Notes

See G1-7, G1-8. Cam. 14 & 16 'are the most common and widely found platter types in Britain, neither of which was standardised much before the beginning of the Claudian period' (Rigby 1978, 199). They are always in TN or Roman grey wares, and rare abroad. At Sheepen, I (just) to VI and later; Braughing, two in TN, c.AD 45-50 (Partridge 1981).
