Notes

At Sheepen the Gallo-Belgic bell-shaped cup form Cam.53-54 was I-III/IV (AD 10-61). Cam.68 was in Roman grey ware, and always post-43. The Hertford Heath pot was considered a copy of Drag.30, but it is not very similar, and in fact seems closer to the other copies of Cam.68 here; it is certainly grog-tempered, and dark grey.
